

Switchover to digital TV in Jeeralang, Yinnar South and Boolarra on 9 and 11 February

Broadcasters have advised the Digital Switchover Taskforce that analog TV services will stop transmission at **9.30am** on **9 February** for the Jeeralang/Yinnar South transmitter, and at **9.30am** on **11 February** for the Boolarra transmitter.

Work will immediately commence on commissioning the new digital services.

Viewers can expect partial service of the new digital channels throughout the day as engineers finalise installation and technical issues at the transmitter sites.

Work on the digital services should be finished later in the day. Then, viewers will have access to the full suite of free to air digital TV channels from the local transmitters, including the commercial digital-only channels such as ONE HD, Eleven, GO!, Gem, 7TWO, and 7mate.

You will need to be able to receive digital TV signals to watch these channels. You can connect a set top box or digital TV recorder to your existing analog TV set, or use a digital TV. To pick up the new channels, you may need to rescan or retune your set top box or TV set to store the new channels. If you can receive more than one set of channels, keep those which provide the best reception at your location.

Updated information will be available on the day of switchover including progress of digital services from the Digital Ready Information Line at 1800 20 10 13.
